

HighSide Messages & Meetings

HighSide's secure collaboration platform, delivers an e2e encrypted chat, messaging, file sharing, voice / video calling & online meetings that is easy to use, compliant and secure.

Collaboration for security & compliance conscious organizations

Sitting atop **SecureOS**, HighSide's secure collaboration platform provides a true end-to-end encrypted environment complete with the features and functionality your employees demand. Ensure every communication - chat messages, group conversations, file sharing & document collaboration, voice & video calls - are secure and compliant.

With integrated user management and a real-time sync for identity directories, security and compliance teams can easily streamline data access control based on pre-existing security policies. Integrate existing DLP rules, automatically manage device authorizations and control when or where a user can access certain channels, chats, or files. Additionally, SecureCollab enables both internal team collaboration and third-party engagement in a single secure environment.

With a full compliance suite and an optional FedRAMP and DoD isolated computing cloud, HighSide brings modern business tools to sensitive, confidential and even classified projects.

SaaS, On-Prem & FedRAMP Cloud Options

HighSide's customer's can choose the delivery model that makes the most sense for their security and compliance goals. Whether it's our standard secure cloud, a FedRAMP authorized / DoD IL cloud or their own private / public cloud environment with an on-prem deployment.

Designed for the Security & Compliance Conscious

HighSide enables regulated and security focused teams to leverage modern collaboration tools while meeting and exceeding ITAR, HIPAA, CMMC, FINRA, FFIEC, GDPR, SEC, FCA, UK CE+ and many more compliance requirements.

Enable Business Through Data Security

True end-to-end encryption with **SecureOS** distributed key management ensures data integrity and eliminates man-in-the-middle, TLS / SSL and other vulnerabilities. Give your R&D, product development, HR, finance, and teams handling intellectual property or sensitive information the ability to engage via a modern collaboration platform. Ensure your data stays, your data.

Comprehensive Data Access Controls

Simplify data access control through integrated user and device management capabilities. Admins can enable automated or manual restriction - either to everything or specific channels, data and messages - based on any number of factors including time, location, user proximity, device and more.

Archiving & Compliance Management

HighSide's built-in compliance suite allows for auditability of immutable event, message and metadata logs. Integrates with your existing compliance, SIEM and data analytics technology or manage directly through HighSide. Measured against NSA ICD 503, DISA STIG and NIST 800-171 standards for both US government and enterprise implementations, protection of sensitive and classified data is out-of-the-box for HighSide.

Real-time User Sync

Sync HighSide with your ID database (ex: Active Directory) and auto create access rules based on predefined user groups. Automate access controls based on time, geolocation, and more across channels, groups and files.

Productivity Comes Standard

Just because HighSide is the most secure collaboration platform available, doesn't make it less functional or user friendly than what your employees might be used to. In fact, HighSide has productivity features you can't find elsewhere.

HighSide is the global leader in secure collaboration & distributed data access controls. Powered by a distributed private root of trust encryption protocol. HighSide's suite of products enable organizations to engage securely in a remote first world. Through our zero-trust technology, teams have access to a modern encrypted communications and file sharing platform including voice, video, text and files. HighSide makes security and compliance easy, while reducing the risk of shadow IT and reliance on insecure communications channels.

Delivering applications that users actually want to use and that security & compliance leaders want to deploy since 2015. HighSide's global headquarters is in the Washington DC metro area with offices in the UK and
