

SecureDrive

SecureDrive ensures data portability without sacrificing data security, compliance and real-time access controls

Keep Your Data, Your Data

SecureDrive is a fully encrypted file sharing & cloud storage application - merging the ease of use employees expect from consumer grade systems, with the data security and compliance controls enterprises require. Leveraging **SecureOS**, SecureDrive enables the freedom to securely share & collaborate across internal and external teams without a single security point of failure.

A modern replacement for legacy data storage solutions, SecureDrive offers a secure editing, sharing and storage experience while enabling granular **data access controls**. Sync SecureDrive with your identity database and automatically create access rules based on user groups - or leverage HighSide's detailed user management and customize access manually.

Integrated with HighSide's compliance management suite, SecureDrive is the only comprehensive file sharing and cloud storage solution for security conscious and compliance focused organizations.

Cloud data sharing within regulated industries and secure environments

Meet stringent controls such as ITAR, as well as GDPR, CMMC, HIPAA, NIST & more. HighSide's built-in compliance manager allows for detailed analytics and supports integration to external tools for data access and usage information. FedRAMP IL-6 cloud options available for highly sensitive environments.

Secure & encrypted replacement for legacy data storage solutions

HighSide delivers an easy to use cloud storage and sharing solution with data encryption and access controls at its core. Built with true end-to-end encryption, your data always remains your data, and with no single point of failure, HighSide's security controls meet the strictest standards of data protection including NIST, DISA and NSA guidelines.

Data residency & real-time user access management controls

Ensure data is accessible only by authorized users in authorized locations with real-time user access management controls. Manage data access directly through HighSide or via real-time synchronization with existing user security policy groups, such as those found in Active Directory.

SecureDrive Features

- ### Security First - No Single Point of Failure

Unlike consumer centric cloud sharing & storage solutions, HighSide delivers a natively secure experience. Powered by **SecureOS**, HighSide's revolutionary distributed encryption architecture, there is no single point of failure, no reliance on certificate authorities, and no SSL vulnerabilities.

- ### Seamless Collaboration, No Compromise on Security

Multi-user editing & file sync allows your teams, customers, partners, and suppliers to collaborate on the same document while maintaining file encryption integrity. Finally, a secure way to collaborate on documents and files regardless of extension or sensitivity.

- ### Native Integration With Other HighSide Applications

Use as a stand-alone secure file sharing & storage solution or optionally integrate with **SecureCollab** and access a host of additional productivity features.

- ### Data Residency & Retention

Built in data residency & retention tools give you granular control over your data. Control who, what, where and when your users are able to access data with detailed compliance visibility.

- ### Granular Data Usage & Access Controls

Control your data the way your security and compliance policies demand. Restrict data access by category, enforce view only or watermarking on sensitive information, or enable / disable document sync and more.

- ### Integrated Enterprise User & Device Management

Leverage built-in granular user & device management or sync HighSide with your identity database (Active Directory for example). Automatically create access rules based on predefined user groups, control authorized devices and suspend, revoke or wipe devices through MDM-like functionality.

- ### Securely & Compliantly Extended Data Sharing to Partners, Suppliers, and More.

Extend SecureDrive to partners and authorized third parties to confidently share sensitive documents beyond your organization. Enforce time, location, and other access controls.

HighSide's suite of products enable businesses to engage securely in a distributed, remote first world.

HighSide is the global leader in secure collaboration & distributed data access controls. Powered by a distributed cryptographic key management infrastructure, HighSide's suite of products enable businesses to engage securely in a remote first world. Through our zero-trust technology, teams have access to a modern unified communications and file sharing platform including voice, video, text and files, reducing risk of shadow IT and reliance on dated and insecure communications channels.

HighSide delivers applications that users actually want to use and that security leaders want to deploy. Founded in 2015, the company has offices in Columbia, MD, Esch-sur-Alzette, Luxembourg and New York, NY.
